Eco Crime & Green Criminology

Monday 14 to Friday 18 February at The University of Western Australia

Instruction by
Professor Rob White
The University of Tasmania

The workshop will focus on:

- The institutions and key players involved in matters of ecological, environmental and species justice
- The use of eco-global criminology and horizon scanning in the study of transnational environmental crime
- The dimensions and dynamics of environmental harm
- Specific types of crimes associated with climate change, threats to biodiversity and waste/pollution issues
- Trends, patterns and issues associated with environmental victimisation
- Legal and regulatory responses to environmental crime, including prosecution and sentencing practices
- The interface between ecological sciences, legal studies and social scientific investigation
- Transnational activism, and social and ecological justice

Complete registration form overleaf.
